Shaping global AMR policy: what scientists should do about IPEA  
28 August 2025

# UNGA Political Declaration of the High-Level Meeting on Antimicrobial Resistance—Our Reference Point

- Quadripartite organizations were invited to establish an **independent panel** on evidence for action against AMR in 2025

- Scope of Panel

To **facilitate the generation and use of multisectoral, scientific evidence** to **support Member States** to tackle AMR

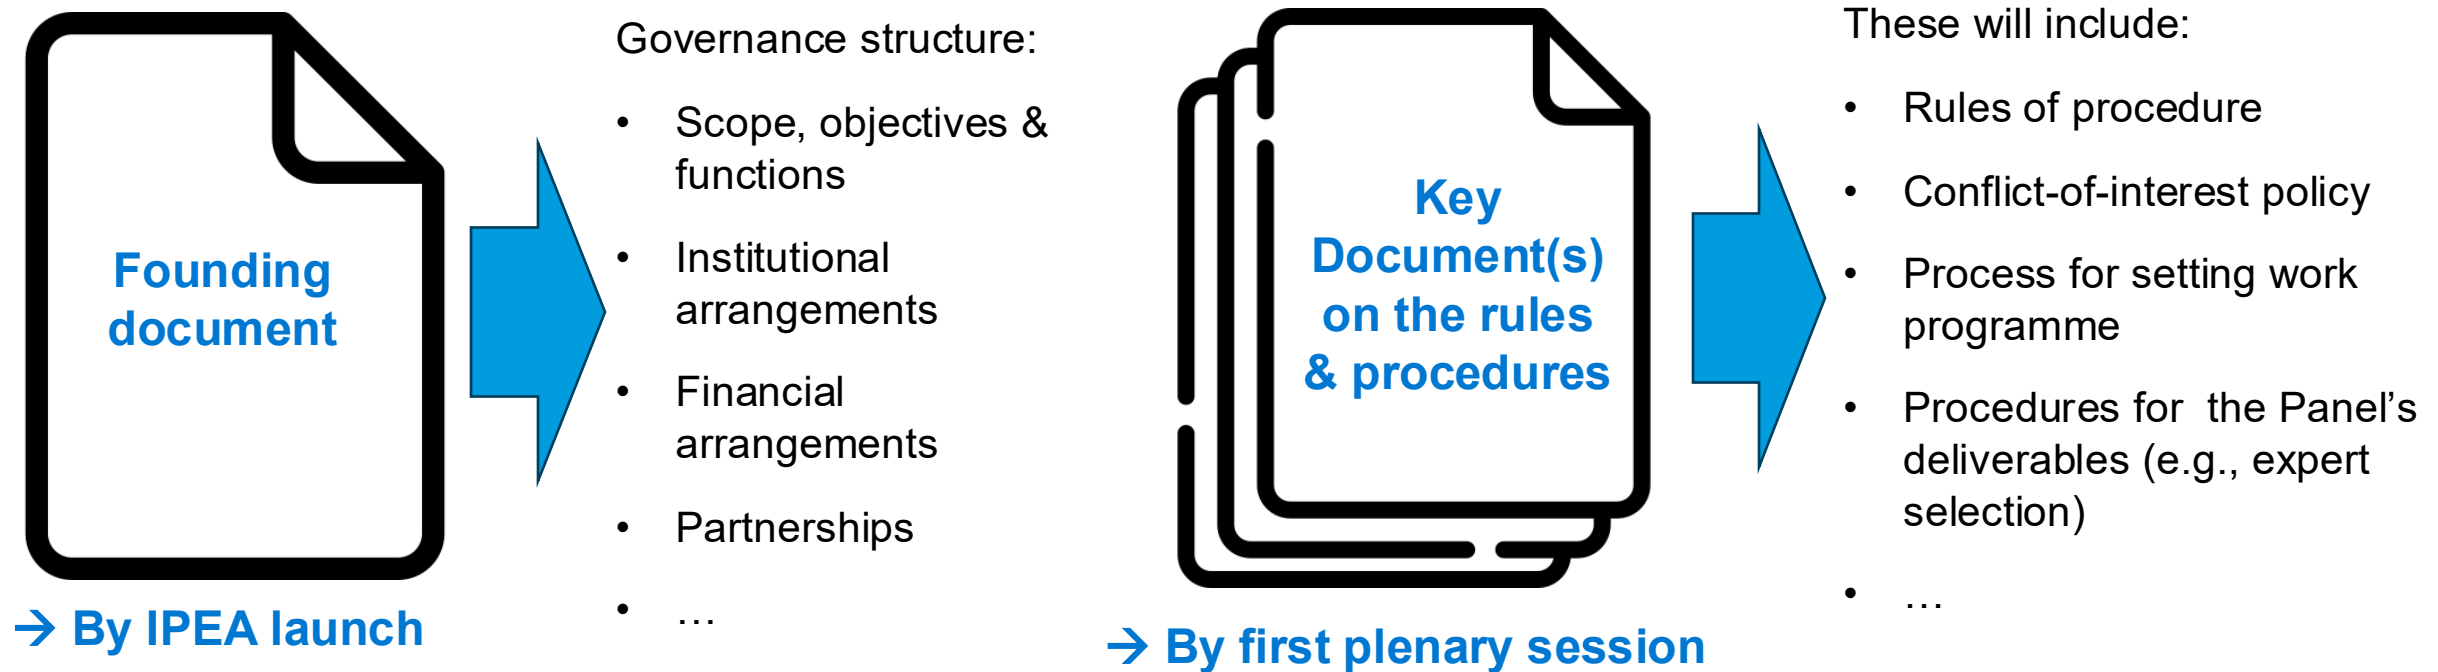

- How will this be achieved?

Using **existing resources and avoiding duplication of on-going efforts**, after an open and transparent consultation with all Member States on its composition, mandate, scope, and deliverables.

# Elements Needed for the Establishment and Operations of IPEA

Building upon existing science-policy panels, a **strong Panel** typically has...

# Functions and Outputs of the Panel

- **Assessments:** synthesize diverse knowledge sources from various sectors into comprehensive, thematic, or methodological reports

- **Horizon scanning:** identify and highlight early signs of emerging risks or opportunities, and appropriate responses

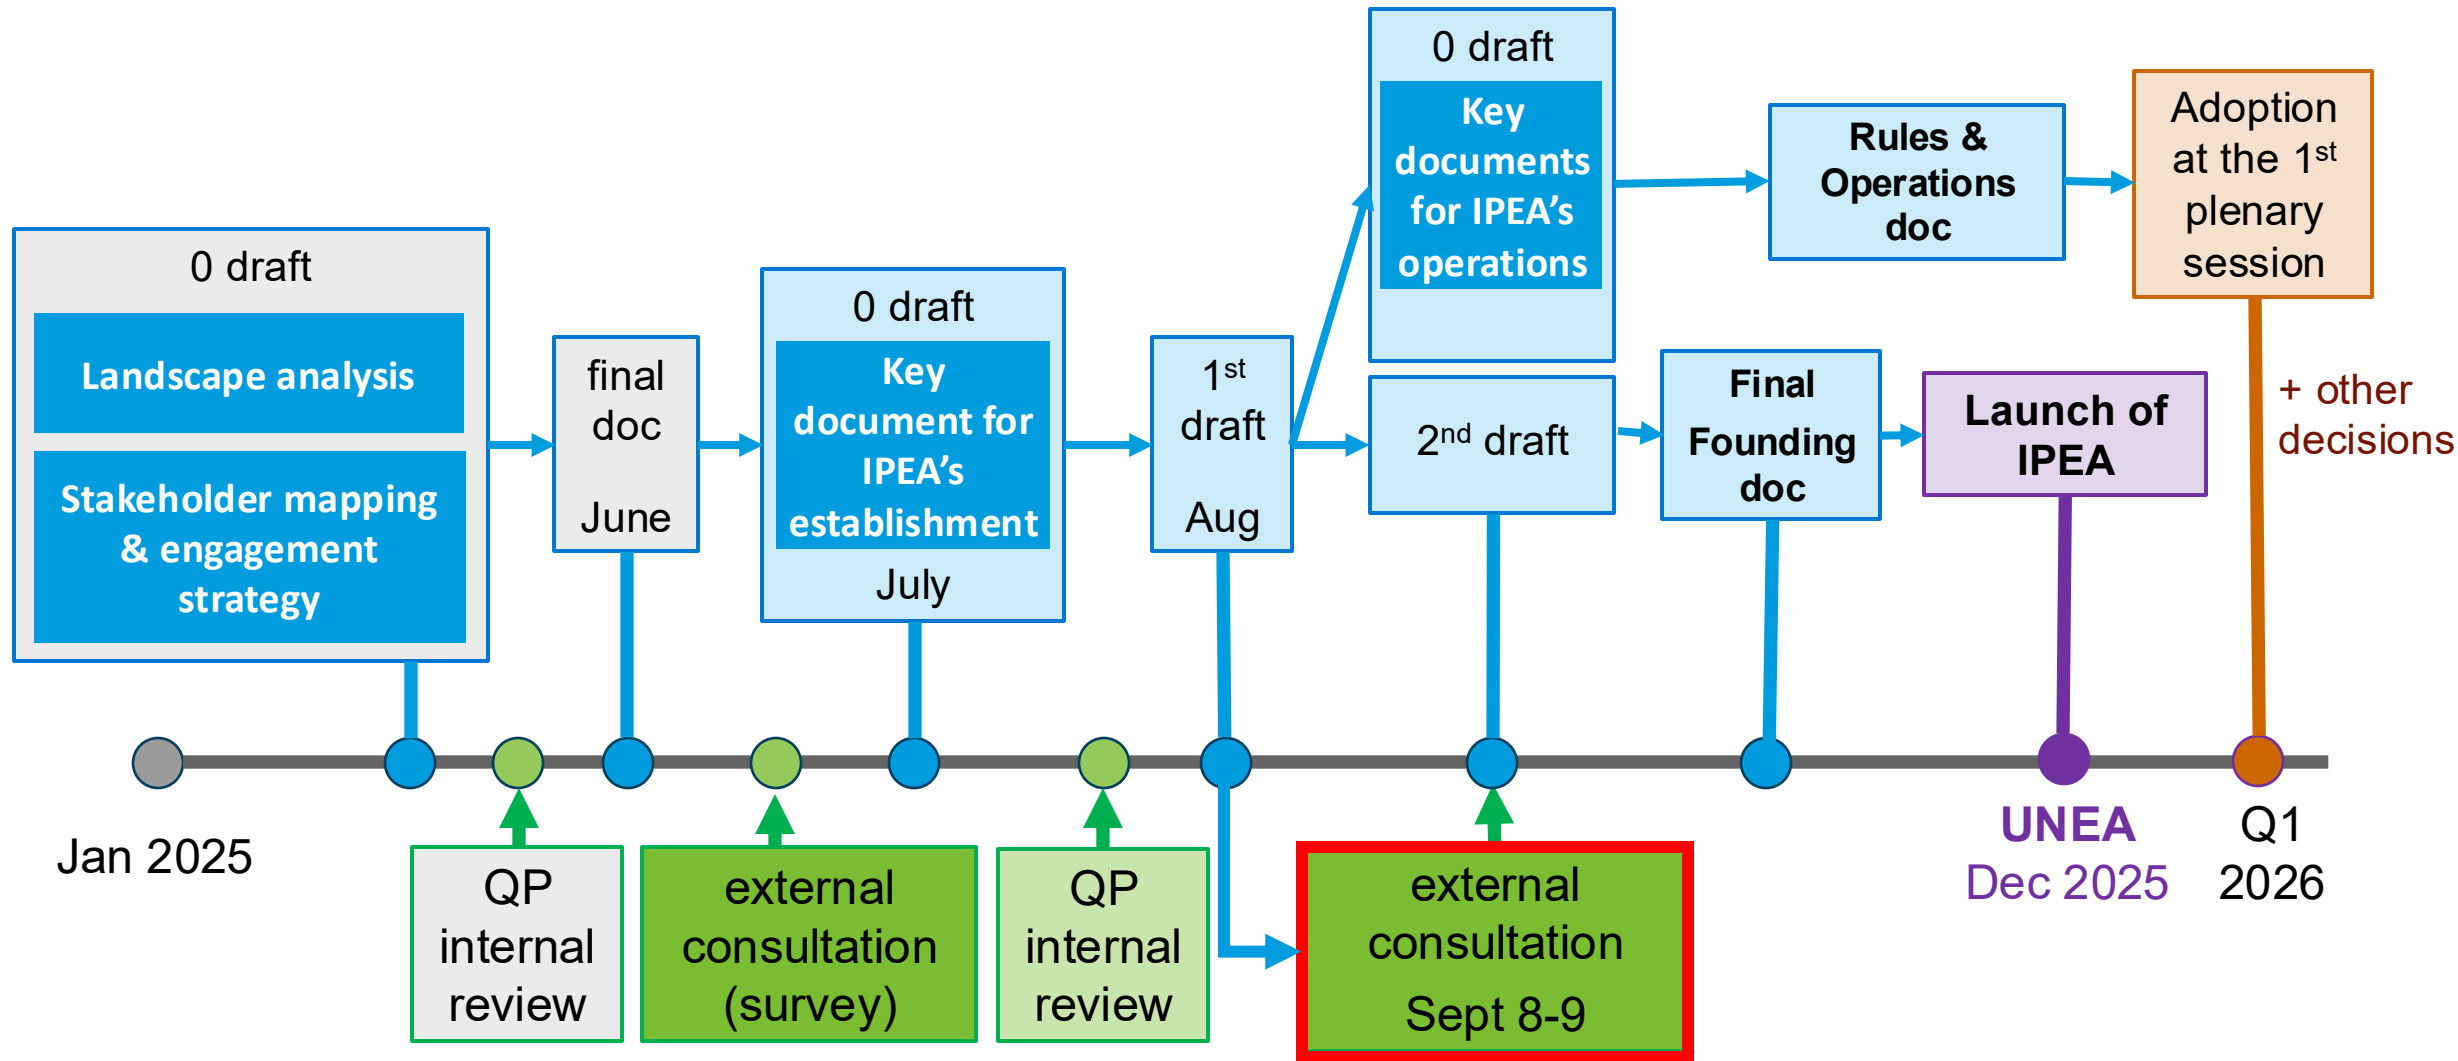

- **Knowledge management:** share information, and identify and highlight research gaps

- **Policy support:** develop tools and methodologies based on the Panel's output to guide decision-making at all levels

# Progression of the consultative process for IPEA

QP- Quadripartite

# How scientists can be involved in the IPEA?

## Direct engagement

- Raise awareness of the Panel among your peers and networks
- Consult national focal points and observers
- Participate the meetings of the Panel's Governing Body
  - As observers
  - As members of the Interdisciplinary Expert Committee or *ad hoc* expert groups
- Participate as authors, information and data contributors, or reviewers in the Panel's work

# How scientists can be involved in the IPEA?

## Indirect engagement

- Generate and publish relevant data and knowledge, including
  - organizing special issues in scientific journals
  - hosting expert workshops/meetings
- Conduct work contributing to the Panel's objectives and functions, e.g.
  - addressing knowledge gaps identified by the Panel
  - translating and disseminating the Panel's outputs
  - fostering uptake of the deliverables by policy- and decision-makers
  - conducting capacity building based on the deliverables

# How can you get involved next?
